a system of calculation, as combinatorial analysis or vector analysis, a method of proving a proposition by assuming the result and working backward to something that is known to be true. Compare synthesis (def 4).

Google Translate

Google's free service instantly translates words, phrases, and web pages between English and over 100 other languages.

Analysis - Wikipedia

Analysis is the process of breaking a complex topic or substance into smaller parts in order to gain a better understanding of it. The technique has been applied in the study of mathematics and logic since before Aristotle (384–322 B.C.), though analysis as a formal concept is a relatively recent development.
