NONIDEAL PLASMA, BASIC CONCEPTS - Oxford Scholarship

This introductory chapter discusses different types of interparticle interactions (Coulomb, electron-atom, and ion-atom) and the criteria of nonideality. The classification of states is given and the range of existence of nonideal plasma is determined. The main features of really existent strongly coupled plasmas, such as two-component fully

Kinetics of excitation and ionization in nonideal plasmas ...

It is shown that quantum effects in dense gases and nonideal plasmas lead to nonexponential tails in the distribution function of electron momenta. This in turn is responsible for nonexponential temperature dependence of ionization and excitation rates in thermal equilibrium. These changes are predicted to be more pronounced than those due to

DYNAMIC METHODS IN THE PHYSICS OF NONIDEAL PLASMA - Oxford ...

This chapter presents an overview of the principles of dynamic generation and diagnostics of strongly coupled plasmas. The dynamic methods of plasma generation are based on hydrodynamic methods of heating a material as a result of viscous dissipation of energy in a shock front or adiabatic compression of the medium. Three techniques most widely
